

## Change is coming!

**Athens Science Festival 2019**  
**Technopolis City of Athens**

**3 – 7 April 2019**

*140 Research, academic and educational organizations | 100 interactive events | 60 labs for kids | 20 workshops | 30 talks | 3 art and science exhibitions | documentaries | competitions | stand up science | happenings for all ages!*

In the constantly changing global community that we live in **Change is coming!** So does in [Athens Science Festival 2019](#)! The educational and cultural milestone which reveals the secrets and wonders of science to more and more visitors every year, returns for the 6th consecutive year, **from April 3<sup>rd</sup> to 7<sup>th</sup>**, to [Technopolis City of Athens](#). This year, Athens **Re-Science** festival changes its name to signify an even better content and activities coming straight...from the future!

Different facets of the world are constantly evolving. Science, technology, arts, human labor, pave new and exciting paths, new perspectives as well as new challenges. Thus, both as individuals and as a society, we need constant reviewing and adaptation of the way in which we approach our knowledge and everyday life. 21<sup>st</sup> century is characterized by two main elements: adaptability and constant change. Thus, we are going through a period where these two elements are not only fruitful and inspiring - they are indeed necessary.

Now, imagine a world where we are all bee hotel owners, we grow vegetables in our balcony, we reuse the old promotional banners and our old trainers, and the children know the secrets of storms, thunders and meteorology like the back of their hand. Imagine a world where microorganisms convert the rainwater into drinking water, marine mammals are protected systematically, schools are supplied by renewable energy sources, and "smart" cities and computers help us take care of our planet every single minute.

This type of world is the one we welcome in Athens **Re-Science Festival 2019**, along with all those students and adults who are enthusiastic about human inventiveness. We aspire all visitors regardless of their age or educational background, to become science fellows, to experience, to experiment, to "get their hands dirty" by playing and trying. Our goal this year is to explore ideas, applications, and new life practices with all of you, so that progress, growth, and the future will ensure the sustainability of our planet.

Join us for a life-changing experience and ideas, in an even more fascinating Athens **Re-Science Festival!** Come and take a glimpse of the wonderful future world of science and humanity!

*And one last thing...*

At the opening ceremony of Athens **Re-Science Festival**, **Thursday, April 4<sup>th</sup>**, we are welcoming the inspiring researcher and explorer **Christian Clot**, CEO of Adaptation Group!

Christian Clot is not the classic example of an explorer, the one whom from a very young age spends sleepless nights over a map dreaming of the perfect trip. His passion for creation and communication led him to write several books of different kinds, from novels and comics, to books of historical content. He has been awarded for his explorations and he has participated in numerous documentaries. In 2006, during his expeditions, he started researching human adaptability, studying the cognitive, psychological and physiological changes that are caused by the exposure of humans to complicated environmental conditions.

*Speech title: How can we adapt ourselves to the future world? ||*

*Date & time: Thursday, April 4th, 18.30. Christian Clot's speech will take place with the support of French Institute of Greece.*

\*Athens **Re-Science Festival** is organized by the educational non-profit organization [Science Communication-SciCo](#), [British Council](#), [Technopolis City of Athens](#), [Onassis Foundation Scholars Association](#), [Ministry of Environment and Energy](#) and the [General Secretariat for Research and Technology](#), in collaboration with academics, research institutions and educational organizations. This year, for the first time, besides from the aegis of [General Secretariat of Research and Technology](#), ASF19 takes place also under the aegis of [Ministry of Environment and Energy](#) which, apart from participating in the organizing process, presents a thematic module on "**Bioeconomy**".

[Idryma Kratikon Ypotofion](#) is a strategic partner of the Festival.

**Soon, with more science news in a festive mood! Stay tuned!**

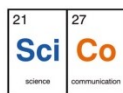

**Days of operation:**

Wednesday April 3<sup>rd</sup> to Sunday April 7<sup>th</sup> 2019

**General entrance:** 5 euros

**Information:** <http://www.athens-science-festival.gr/en/>
